

Accusys Carry 2 Brochure

Purpose-built and optimized for M&E DAS workloads

Carry 2 Storage Solution Highlights

Stable Power Supply

- **External Power Supply:** Equipped with a 12V 4A external power supply to ensure long-lasting stable operation, providing reliable and consistent data transfer.

Superior Compatibility and Connectivity

- **Plug-and-Play:** Fully compatible with mainstream operating systems, requiring no driver installation for ease of use.
- **High-Speed Connectivity Options:** Supports Type-C USB 3.0 and SATA 3.0 for dual-speed stable transmission, with theoretical transfer rates up to 500MB/s.
- **Broad Device Compatibility:** Works with 3.5"/2.5" HDDs and 2.5" SSDs, supporting SATA III and backward compatible with SATA II to meet various device needs.

Intelligent Performance and RAID Configuration

- **Powerful Intelligent Chip:** Built-in support for hardware RAID, delivering low latency, stable data transfer, and efficient heat dissipation.
- **Flexible RAID Mode Selection:** Supports four RAID modes—RAID 0, RAID 1, SPAN, and JBOD—providing diverse data protection and performance options for different usage scenarios.

Accusys Carry 2: Unpretentious, Durable, and Reliable – A New Standard for M&E DAS Storage

The Accusys Carry 2 sets a new benchmark for enterprise-level Media & Entertainment (M&E) DAS storage. Designed specifically for single-user environments, it combines a clean design with stable performance to meet user demands. By delivering enterprise-grade functionality and dependable data services to cost-sensitive markets, the Carry 2 reflects the core values of being unpretentious, durable, and reliable while providing a cost-effective, high-performance storage solution.

Built for Storage Challenges

The Carry 2 is engineered to address diverse storage needs with a focus on reliability and efficiency. It simplifies operations, enhances performance, supports large-capacity storage, and ensures data security—all while keeping costs under control. For professionals seeking high-performance external storage, the Carry 2 is a reliable, long-term choice.

A Practical Storage Solution for Versatile Applications

This 2.5"/3.5" SATA hard drive enclosure is designed to meet a variety of professional demands, including security monitoring, film and HD video editing, gaming storage, digital photography, office expansion, and large-scale cloud data storage. With practicality at its core, the Carry 2 delivers consistent, durable performance, allowing users to focus on their work without worrying about storage reliability.

A Dependable Choice for Media & Entertainment

Whether starting with a single Carry 2 unit or scaling up to petabyte-level workloads with the ACS1012, Accusys offers solutions that meet a range of needs. The Carry 2 is a robust storage product, providing stable and reliable performance in single-user environments, while offering the flexibility to adapt as business requirements grow.

Advanced Features and Cooling Design

- **AI Smart Sleep Mode:** Automatically enters smart sleep mode after 10 minutes of inactivity, conserving energy and extending drive life.
- **Ultra-Fast Data Transfer:** Features USB 3.0 interface with transfer speeds up to 500MB/s, allowing for rapid 1GB file transfers in just 5 seconds.
- **Efficient Cooling System:** Equipped with a 50x50mm intelligent temperature-controlled silent fan, enhancing airflow circulation for rapid heat dissipation, ensuring stable operation over extended periods.

Design and User Experience

- **Simple and Sturdy Design:** Retaining the signature handle and practical design of the Carry series, it offers a straightforward, durable structure with a clean and functional appearance. Perfect for DIT individual studios, it meets the practical needs for high-capacity external storage.
- **Front LED Indicators:** Easily monitor drive activity and RAID status with clear LED indicators, allowing users to quickly check device performance and drive health.
